Diretora do Data Science Institute

Columbia University

Using Data for Good

Using Data for Good: What does it mean? The tagline "Data for Good" emphasizes the need to tackle problems relevant to society and to promote the use of data in fair and ethical ways. It has become even more important to take into consideration legal, social, cultural, and philosophical questions as we invent new technology, and not after it is being used. In this talk I will present the vision and part of the research work developed at Columbia's Data Science Institute.

Jeannette M. Wing is the Avaneassians Director of the Data Science Institute at Columbia University, and Professor of Computer Science. Until June 2017, she was Corporate Vice President of Microsoft Research with oversight of its core research laboratories around the world. Prior to 2013, she was the President's Professor of Computer Science at Carnegie Mellon University. She also served as assistant director for Computer and Information Science and Engineering at the NSF from 2007 to 2010; she is a Fellow of the ACM, and member of the American Academy of Arts and Sciences.
